Wilder Enrique Rojas Marin

Data Scientist · Junior Data Analyst

Lima, San Juan de Lurigancho · 982 199 947 · wilderrojasmarin@gmail.com · linkedin.com/in/wilderrojasmarin

PROFESSIONAL PROFILE

Data Scientist with hands-on experience in data analysis, predictive modeling and data visualization for business decision-making. Proficient in Python (pandas, scikit-learn, matplotlib), SQL Server, Jupyter Notebook and Power BI to build data pipelines, forecasts and high-impact dashboards. A technical background in software engineering allows me to integrate data with real-world systems using Docker and Git. Focused on turning data into measurable value.

WORK EXPERIENCE

MANUFACTURAS SAN ISIDRO S.A.C.

Junior Data Analyst

August 2026 – Present · Current position

- Developed interactive Power BI dashboards connected to SQL Server, with value-per-minute analysis and operational KPIs for real-time decision-making.
- Built sales forecasting models in Python (pandas, scikit-learn), producing weekly forecasts that support commercial and operational planning.
- Designed advanced SQL queries (CTEs, window functions, complex joins) to extract and transform data for production reports and KPI tracking.
- Prepared periodic value-per-minute forecast reports, enabling the operations team to identify bottlenecks and improvement opportunities.
- Documented data pipelines and Jupyter notebooks, ensuring reproducibility and traceability of analyses.

MANUFACTURAS SAN ISIDRO S.A.C.

Full Stack Developer

February 2025 – July 2026

- Implemented a real-time PLC monitoring system: 35% improvement in early detection of industrial incidents.
- Developed automated dashboards and reports with Python and Flutter, reducing production report preparation time by 30%.
- Integrated C# and Python APIs with PLC data reading, improving data capture and analysis efficiency by 80% vs. the previous process.
- Digitized the visitor management process, reducing manual validation time by 40%.

MANUFACTURAS SAN ISIDRO S.A.C.

Professional Internship

August 2024 – February 2025

- Configured and administered databases for web applications, improving information availability by 25%.
- Implemented security measures, reducing vulnerabilities by 30%.
- Achieved a 20% improvement in the stability and scalability of internal systems by applying development best practices.

TECHNICAL SKILLS

Languages
Python, SQL, Java, C#, Dart

Data & Analytics
pandas, numpy, scikit-learn, matplotlib, seaborn

Databases
SQL Server, MySQL, MongoDB

Visualization
Power BI (DAX, data modeling), Jupyter Notebook, advanced Excel

DevOps & Tools
Docker, Git, GitHub, GitLab

Environments
VS Code, Visual Studio, Jupyter Lab

Methodologies
Scrum, Kanban, PMBOK

Industrial
PLC data reading, electrical monitoring, automation

EDUCATION

Universidad Privada del Norte
Computer Systems Engineering · Mar 2025 – Present

Instituto Superior Tecnológico Cibertec
Computing and Information Technology · Oct 2020 – Dec 2024

Instituto Sinergia
Software Engineering · May 2025 – Jan 2026

CERTIFICATIONS & EVENTS

- Platzi 2025: Python, Git and GitHub, GitHub Copilot, Flutter, Introduction to Backend, Project Management PMBOK
- Firebase Day 2025 – GDG Callao / UPC (Jun 2025): Firebase, Cloud, Flutter, Machine Learning, Vertex AI
- AI Developer Day: Build with AI – GDG Callao / UPC San Miguel (Jul 2025): ML, TensorFlow, Gemini, Cloud
- Ng Conf Perú 2025 – GDG Callao / UTP (Sep 2025): Angular, best practices and frontend trends
